SUMMARY

Backend Engineer with 4+ years of software engineering experience building end to end: event-driven serverless AWS infrastructure, RAG and LLM pipelines, and data scraping and automation systems. Speaks English, Hindi and Telugu.

EXPERIENCE

Girgit Inc — *Senior Developer* — *Python | AWS | Distributed Systems*, Hyderabad Aug 2023 – Present

- Owned high- and low-level design of an event-driven serverless backend from the ground up on Lambda, API Gateway, DynamoDB, S3, Cognito and IAM, decoupling services with SQS queues and SNS fan-out so ingestion, processing and reporting scale and fail independently.
- Built RAG pipelines over a large document corpus using FAISS, Neo4j knowledge graphs and local LLMs via Ollama, with OCR and MCP servers exposing custom tools to models.
- Built multi-source ingestion, scraping and content automation pipelines, plus TTS/STT audio generation including low-latency live voice agents.
- Drove code quality through automated testing and CI/CD on GitHub Actions, and instrumented CloudWatch metrics and structured logging for latency, error rates and throughput to tune performance.

Flyberry Gourmet — *Automation Engineer (Freelance)* — *Python | Flask | pandas | AWS*, Remote Jun – Jul 2023

- Built a full-stack PO processing tool handling ~100 purchase orders a week: Flask REST API with pdfplumber extracting line items, pricing and HSN codes from PO PDFs to CSV, deployed on S3/CloudFront with a Lambda + API Gateway backend, cutting ~20 hours of manual data entry a week.

Accenture — *Software Engineering Associate* — *.NET | C# | Oracle SQL*, Hyderabad Jan 2022 – Apr 2023

- Maintained and enhanced a C#/.NET Framework WinForms application supporting policy and claims workflows for a Fortune 500 specialty insurer, performing RCA on production defects across the .NET front end and Oracle data layer in an Agile/Scrum model through to UAT and release.
- Wrote and optimized Oracle SQL queries and PL/SQL stored procedures across large policy tables, and built Excel reporting and reconciliation tools with VBA and Power Query, saving ~2 hours of manual effort daily.

RECENT PROJECTS

Serverless Deploy Automation | *Python, boto3, AWS Lambda, DynamoDB, API Gateway, Cognito* Jan – Feb 2026

- Script-driven pipeline provisioning and wiring AWS resources with auto-incrementing environment naming. Cognito JWT auth with RS256/JWKS verification and local key caching. Teardown script deletes all resources in reverse dependency order.

NEET RAG | *Python, FAISS, Sentence Transformers, llama.cpp, PyMuPDF, Streamlit* Aug 2025

- Fully local retrieval-augmented generation pipeline answering queries from custom PDF material via FAISS vector search — offline inference with TinyLlama and llama.cpp, multi-turn Streamlit UI feeding conversation history into the prompt for grounded answers.

TECHNICAL SKILLS

Languages: Python, C#/.NET, SQL (Oracle, PL/SQL), LaTeX

AWS: Lambda, API Gateway, DynamoDB, S3, SQS, SNS, Cognito, IAM, CloudWatch, ECS, ECR

AI / ML: FAISS, Sentence Transformers, RAG, Ollama, llama.cpp, Neo4j, scikit-learn, pandas, OCR, TTS/STT, MCP servers

Backend & Practices: Flask, Node.js, REST APIs, Terraform, Docker, CI/CD (GitHub Actions), automated testing

Tools: Git, GitHub, VS Code, Postman, Jira, ServiceNow, Linux/Bash

CERTIFICATIONS

AWS Certified Solutions Architect — Associate (SAA-C03), Aug 2026 | **HashiCorp Certified: Terraform Associate**, Aug 2026 | **Machine Learning Specialization** — Stanford Online (Coursera), *Ongoing* | **AI Agents Fundamentals** — Hugging Face | **Azure AI Fundamentals (AI-900)** — Microsoft, Jan 2023

EDUCATION

Vasavi College of Engineering, Hyderabad — Bachelor of Engineering | **CGPA: 7.61/10** 2017 – 2021

Narayana Junior College, Hyderabad — Intermediate (10+2) MPC | **Grade: 94.4%** 2015 – 2017
