EXPERIENCE

Girgit

2024 – Present

Lead Developer

Hyderabad, India

- Architected and deployed a production-grade product using a high-performance stack of Go and Rust.
- Leveraged Cloudflare Edge computing to minimize latency and scale globally for zero-latency user experiences.
- Engineered full-stack CI/CD pipelines using Terraform for automated, risk-free deployments.
- Optimized storage costs and query speeds by implementing a multi-region PostgreSQL and Redis caching layer.
- Led the entire product lifecycle from initial conceptualization to final deployment and maintenance.

Flyberry Gourmet

2023 – 2024

Software Engineer (Automation)

Hyderabad, India

- Engineered a custom internal automation suite using Python to streamline critical supply chain workflows.
- Built a high-performance data processing frontend in React, improving data extraction efficiency by 60%.
- Designed and managed a robust backend API on Render, handling complex data transformations with 99.9% uptime.
- Automated manual reporting tasks, saving the operations team over 20+ hours per week.

Accenture

2021 – 2022

Application Development Associate

Hyderabad, India

- Developed and maintained scalable RESTful APIs on AWS for enterprise cloud-native solutions.
- Automated infrastructure provisioning with Terraform, reducing manual environment setup time by 40%.
- Streamlined data synchronization between legacy on-premise systems and AWS cloud-native services, enhancing data consistency by 30%.
- Collaborated in cross-functional Agile teams to deliver secure, high-availability cloud infrastructure.

PROJECTS

Governance AI | PyTorch, Transformers, Python

- Trained a custom language model from scratch on regulatory data to automate complex governance research.

DocuQuery | Next.js, FastAPI, LangChain, AWS

- Built an AI-driven RAG pipeline for intelligent document Q&A with high-precision citations.

EdgeCache | Rust, Tokio, Redis, gRPC

- Engineered an ultra-low latency distributed caching layer designed for high-throughput edge nodes.

SecureScan | Python, Boto3, AWS Lambda, Terraform

- Developed an automated security auditing engine for real-time AWS infrastructure compliance reporting.

CERTIFICATIONS

AWS Solutions Architect Associate, AWS Machine Learning Specialty, Google Professional ML Engineer, HashiCorp Terraform Associate, Microsoft AI-900

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Go, Rust, SQL, HTML, CSS, LaTeX

Frameworks: React, Next.js, Node.js, FastAPI, Tailwind CSS

Infrastructure: AWS (EC2, S3, Lambda, SageMaker), Terraform, Docker, CI/CD, Cloudflare

Databases: PostgreSQL, MongoDB, DynamoDB, Redis, Neo4j (Graph)

Specialties: Generative AI, RAG Pipelines, LLM Integration, LangChain, Vertex AI

EDUCATION

Vasavi College of Engineering | CGPA: 7.61/10

Hyderabad, India

Bachelor of Engineering

2017 – 2021

Narayana Junior College | Score: 94.4%

Hyderabad, India

Intermediate / 12th

2015 – 2017

SPOKEN LANGUAGES

Languages: English, Telugu, Hindi, French, Spanish
